

# Evren Ispiroglu

**Date of birth:** 29/05/2002 | **Nationality:** Turkish | **Gender:** Male | **Phone number:** (+90) 5427261042 (Mobile) | **Email address:** [evrenn.ispiroglu@gmail.com](mailto:evrenn.ispiroglu@gmail.com) | **Website:** [ispiroglu.github.io](https://ispiroglu.github.io) | **Github:** <https://github.com/ispiroglu> | **LinkedIn:** <https://www.linkedin.com/in/eispiroglu/>

## ABOUT ME

Results-oriented Software Engineer with extensive experience architecting and implementing robust distributed systems and microservices. Proficient in Go, Java, Kotlin, and Spring, with proven success in optimizing system performance and delivering innovative, high-impact solutions. Passionate about leveraging event-driven architectures and modern DevOps practices to drive efficiency.

## WORK EXPERIENCE

01/01/2025 – CURRENT Istanbul, Türkiye  
**SOFTWARE ENGINEER** TRENDYOL

- Optimized a RAG-based application, enhancing process efficiency and overall performance.
  - Refined my time management and task prioritization to boost productivity and quality.
- Embraced new responsibilities following a recent promotion and actively explored innovative solutions.*

27/11/2023 – 31/12/2024 Istanbul, Türkiye  
**ASSOCIATE SOFTWARE ENGINEER** TRENDYOL

- Collaborated within a team dedicated to the Q&A domain, driving design and implementation improvements.
  - Designed asynchronous data flows using CDC and message queues to significantly boost throughput.
  - Applied CQRS principles and implemented multi-data-cluster strategies to optimize system performance.
  - Engineered solutions to manage high traffic, handling up to 1.2M RPM during campaigns.
  - Developed an integrated architecture for processing both international and Turkish question responses.
  - Implemented server-sent events to replace polling, reducing server load and incoming request volume.
  - Contributed as a key member to the open-source Golang framework, Chaki.
  - Developed a RAG-based application that increased conversion rates by up to 3x.
- I focused on driving innovation and efficiency within a high-impact environment, contributing to both core platform improvements and impactful features.

05/09/2023 – 27/11/2023 Istanbul, Türkiye  
**JUNIOR SOFTWARE ENGINEER** DOGUS TECHNOLOGY

- Contributed to the early design of a multi-tenant microservices project, establishing a strong project foundation.
  - Led proof-of-concept initiatives to evaluate and select optimal technologies.
  - Designed and implemented a robust authentication API for a multi-tenant application using Kotlin and Spring Boot.
  - Developed the core of a back-office project with React and TypeScript, enhancing code quality and maintainability.
  - Resolved critical production issues, resulting in a 20% improvement in application responsiveness.
- After a successful one-year traineeship, I transitioned into this role as key decision-maker and implementer, driving impactful improvements and innovations.

05/09/2022 – 05/09/2022 Istanbul, Türkiye  
**SOFTWARE ENGINEER TRAINEE** DOGUS TECHNOLOGY

- Transformed legacy applications by migrating them to a microservices architecture, significantly enhancing scalability and traceability.
- Developed robust back-end solutions using microservices, asynchronous/reactive programming, CI/CD pipelines, message brokers, API gateways, and Kubernetes.
- Engineered applications with Kotlin, Spring, PostgreSQL, and MongoDB, utilizing tools such as Jenkins, Kubernetes, Elasticsearch, and Kafka.
- Integrated dynamic user interfaces with back-end systems using React.
- Applied proven design patterns to deliver efficient, scalable, and maintainable software solutions.

04/07/2022 – 18/08/2022 Istanbul, Türkiye  
**FULLSTACK SOFTWARE ENGINEER INTERN** LC WAIKIKI

- Designed and developed a full-stack application using Spring Boot and Angular, demonstrating a solid software development foundation.
- Utilized DevOps tools such as Git, Docker, and GitHub Actions to streamline code deployment and integration processes.
- Participated in Agile (Scrum) practices, contributing to daily stand-ups, sprint planning, and iterative development cycles.

● **EDUCATION AND TRAINING**

---

10/2020 – 06/2024 Istanbul, Türkiye  
**COMPUTER ENGINEERING** Yildiz Technical University

---

Website <https://ce.yildiz.edu.tr/>

● **PROJECTS**

---

**Chaki: Application Framework**

---

- Collaborative Development: Contributed as the second most active team member to build an application framework on top of Uber FX, like Spring's auto-configuration plus file-based configurability.
- Streamlined Processes: Helped eliminate boilerplate code for critical functionalities such as tracing, OpenTelemetry, Swagger integration, and logging, resulting boosting development efficiency.
- Enhanced Productivity: Played a key role in creating a customizable, reliable framework that accelerates application development and maintains consistency across projects.

Link <https://github.com/Trendyol/chaki>

**Mercurius: Message Broker**

---

- Designed and Developed: Engineered a messaging system to facilitate efficient communication across distributed systems.
- Objective-Driven: Focused on creating a reliable, scalable, and efficient message broker capable of handling high message volumes.
- Technical Implementation: Implemented the core message broker using Go, incorporating leveled logging for enhanced traceability and monitoring.
- Performance Optimization: Integrated gRPC to reduce latency and maximize system utilization.

This project provided a hands-on experience in system design and development, reinforcing my skills in Go programming, distributed systems, and performance optimization.

● **HOBBIES AND INTERESTS**

---

**Photography**

---

- Served as a Board Member of the College Photography Club, contributing to the success of multiple exhibitions and seminars with renowned photographers.
- Organized training programs at various skill levels, promoting a passion for photography among students and faculty.
- Collaborated with fellow members to facilitate creative and educational events, fostering a vibrant photography community on campus.

● **DIGITAL SKILLS**

---

Go | Java | Kotlin | Spring Boot | Docker | Kubernetes | Couchbase | PostgreSQL | Elasticsearch | Microservices | Distributed Systems | CQRS | CDC | Agile Methodologies
